PROFESSIONAL OVERVIEW

Continuing in my final year at UTS studying mechanical and mechatronics I'm heavily invested towards innovating automation systems and mechatronic solutions. I particularly excel in team environments, with high interests in CAD, engineering analysis, troubleshooting and prototyping.

CAREER SUMMARY

Labrotary Intern Smart MCs Terrey Hills	Nov 2025 - Current
Mechatronics Production Intern All-Systems Electronics Seven Hills	July 2024 - Current
Casual Employee Cotton On Castle Towers	June 2023 - July 2024
Merchandise Stocker Costco Marsden Park	Dec 2022 - May 2023

EDUCATION

WAM 75.3	University of Technology Sydney, UTS Bachelor of Engineering (Honours) Mechanical and Mechatronics	Expected, End of 2026
ATAR 85.85	Tyndale Christian School, HSC	Graduated, 2021

ENGINEERING WORK EXPERIENCE

Laboratory Intern | Smart MCs Nov 2025 - Current
Entering a new field, I've worked at Smart MCs as a Laboratory Night Intern. With focus on production of microcarriers, I've become well-versed in casting, emulsification, troubleshooting and microfluids. I've also had opportunity to work on smaller, day-to-day projects and tasks.

Mechatronics Production and Junior Designer | All-Systems Electronics Jan 2025 - Current
Following my internship I've continued at All-Systems Electronics as a casual. My main roles range from mechanical designs to create 3D printed solutions, to designing PCBs under client and contract work, electronic systems and creating testing equipment. Other roles include wiring, programming and assembling PLCs and general production work.

Mechatronics Junior Intern | All-Systems Electronics July 2024 - Dec 2024
Employed full-time over six months as a junior intern. All-Systems Electronics trained me to understand and apply IPC-A-610 standards which would be applied in electronic systems assembling, SMT and Through-Hole soldering and validating, inspecting and testing of electronic systems. I successfully completed a major-project which assigned me to create an electronic system used in testing oven interface boards - see LinkedIn for further explanation.

TECHNICAL SKILLS

CAD (SolidWorks, FreeCAD) | **3D Printing** (P1S, Prusa MK4) | **PCB Design & Electronics** (Altium, TinkerCAD) | **Photo and Video Editing** (VEED, Canva) | **MicroFluids** (Smart MCs) | **Programming** (C++, C, Java and Python) | **MS Office Suite** (Word, PowerPoint, Excel) | **Wiring** (PLCs)

UNIVERSITY PROJECTS

Smart Toaster - DMMS

Nov 2025

Created a comprehensive dock assembly to serve as an extension to toasters to make them intelligent and measure doneness. Achieved **High Distinction**

PCB Assembling in Confined Spaces (Simulation) - Industrial Robotics

Oct 2025

Developed a program via Python which simulated PCB manufacturing through robotics. Achieved **Distinction and HD** for the related assignments.

CoreGuard - Entrepreneurship and Commercialisation

May 2025

Created a innovative laptop casing prototype to mock the processes involved in developing a marketable product. Achieved **Distinction**.

Solar BBQ - MSDS2

May 2025

Developed a solar BBQ through APA³D standards, with heavy focus on engineering analysis and processes in product development. Achieved **Distinction**.

StepTracker - Embedded Mechatronics Studio

May 2024

Created a step-tracker prototype through developing a printed circuit board. Achieved **Distinction**.

Warman Competition Challenge 2023 - MDFS1

Nov 2023

Competed in the Warman Challenge within my campus and course's intake. My group accomplished **1st place** in our tutorial class and **5th place** in the entire intake.

TRANSFERRABLE SKILLS

Attention to Detail > Trained with IPC-A-610 standards, trained to use microscopes, soldering equipment, cameras and other specialised equipment.

Critical Thinking and Iteration > Earned through a range of projects, internships and experience.

Leadership > Lead multiple group projects, typically achieving Distinction-High Distinction. Also lead extra-curricular groups through societies, church and school.

Social Media > Engineering focused account at **@bengineerings**

Time Management > Often juggled multiple tasks and due-dates within my engineering jobs and studies

Software Adaptability > Adjusted to alternative software's dependent on the environments requirements, for example, SolidWorks (UTS) to FreeCad (All-Systems).

EXTRA-CURRICULAR ACTIVITIES & HOBBIES

Volunteer | Hillsong Church | Baulkham Hills, Sydney

12/2021 - 12/2025

Leading a group of high-school boys in the youth group has allowed me to enact leadership and initiative. Here not only do I mentor and lead these boys but also assist in managing youth sessions, this involves tasks such as contributing in teams, public speaking, venue preparation and pack up and more.

Engineering Side Projects

I enjoy utilising my creative side in side projects, some of these have ranged across from customised key chains, flower vase and magnetic labels to fridge-shelf fixes, exhaust-pipe mounts and more.

Sports | Basketball | Soccer

Recently I've engaged myself back into team-sports with fellow church friends.
